Members of the City Council and Residents of the City of Genoa, Illinois:

I sincerely appreciate the opportunity as Mayor to be presenting you a proposed Budget for the City of Genoa for our approaching new Fiscal Year.

Composing this Annual Budget message to you affords me a chance to reflect upon all the positive achievements we have accomplished over this most recent past year. Further, we additionally can contemplate great opportunities for future benefit offered by some of the initiatives commenced this year. Thirdly, this Budget message enables setting our course so that the new year's latest objectives provide results to advance our community in the upcoming year.

We have continued to strongly pursue efforts this year in utilizing emerging technologies that will bring results in this new Fiscal Year, and for many future years. In particular, this has been through the social media as a way to connect with and be closer to our residents and taxpayers. Implemented during this year, exemplifying this new technology, has been CodeRED, a new service to directly contact our residents in the event of emergencies. Certainly we are now a safer community in that lives can be protected in the event of a natural weather disaster by directly warning residents who may not have heard the outside warning sirens. In addition, this system also allows greater staff efficiency and more productive utilization of our very lean staffing due to economic conditions. This capability allows us now to send notifications electronically to residents in a neighborhood about a water main break averting door to door contact time by Public Works staff.

These times have continued to be very financially challenging due to the current national economy. So to compensate, we are a City that works harder and smarter to persevere in difficult times and remain on a steady and positive course. We are preserving not only our fiscal stability as we maintain day to day services, but at the same time we have been improving our municipal infrastructure and the physical investment in our community, and are now embracing new technology to enhance services to our residents.

While the control of revenue and expense remains the primary focus of our Budget document, a solid framework for implementing our programs, and for monitoring of our fiscal policies is accomplished through our Budget process and document, especially via this Budget transmittal letter. The independent recognition accorded to the City demonstrating a continual excellence in financial management is an achievement for which our residents can be justly proud. This has been achieved by the *repeated* annual recognition that our Comprehensive Annual Financial Report has met the high national standards of "Excellence in Financial Reporting" from the Government Finance Officers Association (GFOA). We were recently notified that our most recent Audit Report has achieved this prestigious GFOA award *for the ninth year in a row!* Only a small percentage of Cities nationally meet this quality in financial reporting. Genoa has been one of the smallest, if not the smallest City in Illinois to achieve this award as a mark of distinction in financial transparency and public responsiveness. This high level of information and accuracy not only protects the interests of taxpayers, but it is also recognized by bond

rating agencies that can lead to lowered costs for City project financing. Efforts to achieve such recognition have returned dividends, demonstrated by the ease in which we accessed the capital markets, at an excellent interest rate, to finance a major construction program for upgrading our street system infrastructure, providing multiple years of benefit, indeed, with construction which will be continuing even into this new Fiscal Year.

The 2015-2016 Budget: I am indeed pleased to present to you once again with an overall balanced budget for the 2015 – 2016 Fiscal Year for the City of Genoa, Illinois. Further, this Budget is presented with the goal of continuing to provide Genoa residents a wide range of services, while respecting our significant budgetary constraints. All across the Country over the past few years Fiscal distress has been an endemic national experience for local governments, and most certainly for those in Illinois. And we drafted this Budget with perhaps one of the most disastrous proposals to municipal finances looming from the State Government.

There are certainly numerous local examples of governments severely stressed with revenue decline, and yet concurrently with greater cost pressure. But a frightening example can be seen in our own State of Illinois. Springfield has implemented huge percentage "temporary" tax increases recently and experts at that time questioned if this would even resolve the State's fiscal crisis. And the experts' insight has been on target, with the State still undergoing fiscal torment, inflicting revenue cuts upon local governments as in the case of the Personal Property Replacement Tax diversion, to pay for State mandated elective offices, the first time the State has intruded into taking what had essentially originally been a property tax, for the State's own use. The State's mess is resultant from the State not choosing to make the tough ongoing decisions to prudently manage their self-made fiscal challenges, in contrast to what we as the City's elected officials instead have done locally. And one of the solutions for bailing out the State's wastrel mismanagement is to make someone else pay their bills in the form of cutting our municipal share of the income tax in half.

Again the news media is abundant with stories about fiscal distress pertaining to Cities and Villages, school districts and other entities throughout northern Illinois, which have all been struggling with the national economy. Unlike the State, the City has no opportunity to even implement "temporary" tax increases, and the City in the past responded to the challenges through very difficult but imperative past cost reductions, carefully measured across all City functions.

Much hard work has been required in pursuit of our objective, but I am very satisfied to report that once again we have been able to prepare a budget that maintains our essential services to our residents. This has been a further strenuous challenge, since we are not adding taxes, because unlike many of our neighbors, we do not have the resources that they do as home rule communities to increase taxes.

As a non-home rule City, the City is severely restricted by State law from increasing revenue. Further, the property tax cap law imposed by the State legislature limits the City's property tax income by the change in the Consumer Price Index (CPI). And now the possibility of an absolute freeze on property tax revenue for local governments has been floated by those in State government, at the same time possible State tax *INCREASES* are on the table, besides a massive threat to our ability to provide minimum essential services by the State pilfering our local revenue. The recent State income tax increase provides no assistance to municipalities. For the first time since the implementation of the Illinois Income tax Cities received NO increase from the State Income tax increase, unlike in the past, and it is now abundantly clear

that this tax increase in fact *did not* pay the backlog of overdue invoices of the State and served not at all to blunt the State financial management debacle.

State law mandates the that City contribute to what is known as the Downstate Police Pension program, representing a significant increased burden for the City these past few years. The legislature decides the benefits for this program, and therefore sets the cost. The City has no say in the cost, but the State pays *nothing* toward the program, with all the costs covered locally. Essentially, Springfield decides the purchase, but sends us the bill. Currently, the City must contribute over 50% of each full-time Police Officer's salary as an additional cost for funding the Police Pension program. With Federal FICA contribution cost also required, the total City funded pension cost for a full time police officer is about 60% of salary. While revenues beyond our control have dropped, the State continues to enact mandates with costs we are forced to absorb. The State has failed to fund its own pension program obligations, and has attempted to reduce the costs for its own obligations. Yet the legislature has now added penalties for not meeting the funding goals set by them, paid by us, for the programs and benefits *they* establish. This latest State mandate on us at the local level has been set by a State *that has not been meeting the cost responsibility for their own State funded pension programs*. And of course the "cap taxes" philosophy does *not* apply to the State.

While we must recognize these financial obstacles, we would be remiss if we did not spotlight the numerous accomplishments we have seen in the past year.

Despite the economic challenges, the City has been working with a strategic direction to derive gain that may be available from the current economy to enhance the community. Particularly this has been through taking advantage of the opportunity of Federal and State economic stimulus programs for capital improvement grants and funding. As a result, despite challenges in operating revenue, infrastructure investment in Genoa has been very strong. The West Main Street and East First Street resurfacing projects, resurfacing of Main Street from Route 23/72 to West Main Street, the North Central Interceptor sewer project, the Second Street area grant resurfacing project, the South Washington Street improvement grant and North Brown Street improvement grant are just some examples of successfully bringing in outside dollars as an investment in our local infrastructure. These funds would have been spent in other communities if the City had not worked very hard to get these dollars for Genoa. Recently, additional grant funded projects were underway, for open space trails and riverbank protection as specific examples.

Our commitment to Economic Development and Professionalism in Municipal Government has been responsible for a majority of these accomplishments. In the past number of years we have repetitively achieved the highest quality of financial reporting, as validated by the GFOA awards, the City continues to win Tree City awards and recognition from IEPA on water quality achievement. Further, we have reaped benefit from having assistance in economic and community development which has provided an increase in our City's non-residential tax base over the past few years.

The additional commercial businesses thus recruited and retained diversifies and balances the tax base, but it also gains much more than this. An expanded hardware business, more physician and physical therapy access, a florist, more restaurants, expanded winery with outdoor seating, and other services from this economic development effort has provided more local services for our residents' benefit too. As some businesses changed their operations serving the Genoa market, we have worked hard to replace their services in the past few years

resulting in the successful location of a new grocery store and a new pharmacy, while also gaining a new Garden Center, a bakery, and a new brewery and tasting room, therein also providing new services for residents not previously available in the City.

With demanding fiscal times, achieving utmost value through careful use of resources is both financially beneficial, and it is environmentally conscious too. Savings and conservation has been a sustained focus for the past few years, and this new Fiscal Year is no exception. As we have pursued emerging technologies this past year and continue over future years, including electronic communication capabilities such as our improved website, electronic bill payment for residents, and *CodeRed* notification technology, we can lower the City's impact on the environment, without reducing the quality and expected services to Genoa residents.

The City achieved a very special recognition recently by receiving the "Best Operated Wastewater Treatment Works Award". The City had been nominated by the Illinois Environmental Protection Agency's Division of Water Pollution Control for this significant Award and the Award was presented by the Illinois Association of Water Pollution Control Operators. Thus the Award represents a nomination by the oversight agency for our facility, and the selection as best from our peers. Performance of wastewater treatment facilities is crucial to protecting our aquatic environment and the City's Department of Public Works takes this responsibility most seriously, not just meeting the strict regulation of the Illinois and US Environmental Protection Agencies, but performing its responsibilities at the highest level, as confirmed by this Award.

Another Award, presented within this past year was the selection of the City of Genoa as winner of the *Outstanding Conservation Project Award* by the DeKalb County Soil and Water Conservation District Board of Directors. The Award is for the City's efforts in the open space development adjacent to Oak Creek and RiverBend and for the stream bank stabilization project that has been accomplished along the Kishwaukee River over the past few years.

The City continues to explore all possible means for outside revenue or to innovatively save money. We obtained \$162,000 in Federal ARRA funds for the West Main and East 1st Street projects, \$2,350,000 for the North Central Interceptor from the IEPA, \$500,000 in 100% State funding for the major Main Street resurfacing, and the City was awarded \$370,000 in grant funding for the Second Street area resurfacing project. Further by qualifying for the STP grant program, we have received grant funds that have improved South Washington Street and North Brown Street. Added funding has been awarded for South Sycamore Street resurfacing to be under future engineering design as part of the process needed to use these Federal Street grant funds.

The City was a founding member of the Northern Illinois Governmental Electric Cooperative (NIGEC). As one of the City's efforts to achieve maximum value with public funds, this Intergovernmental Agreement includes a number of area local governments for energy market savings by purchasing with a combined usage volume. Through its membership in NIGEC, the City was able to obtain reduced electrical cost for its larger accounts and lock in an approximately a 30% annual savings for 4 years, which savings continue in the current Fiscal Year. Based on the City's proposal the consortium has been monitoring the markets for possible group pricing for natural gas. The City renewed its membership in this intergovernmental cooperative organization this year which has changed its name to the Northern Illinois Purchasing Cooperative, or *NIPC*.

In order to help its residents potentially save money on their electric bills, the City successfully passed an *electrical aggregation* referendum. Although it does not provide any revenue to the City, and represented another challenge on its plate, the City pursued this program because it was the right thing to do to give a cost savings option for our residents to choose. To further potential savings for our residents, and as yet another example of our extensive success in intergovernmental relations, the City was a founding member with a group of other local governments in an intergovernmental agreement, NIGEAC — the Northern Illinois Governmental Electric Aggregation Consortium. This is intended to provide a large base of customers in an effort to attract favorable pricing and for efficiency by sharing the implementation efforts with a larger group.

NIGEAC has indicated that the group's extremely low rate provided residents and small businesses participating in our program an average account savings of about \$400 in the first year. The Intergovernmental Agreement was recently renewed and the fourth year pricing has been obtained, with a reduction from last year's rate, and the expectation of continued savings compared to the rate available from ComEd.

CodeRED represents a further commitment to emergency preparedness that was implemented in our current Fiscal Year. Our focus on Disaster Preparedness has been well founded when one views the risk that we all encounter in natural disasters, with tornado devastation in the Midwest and our own State. And yet potential emergencies may not just be through natural events such as tornados that are prevalent in northern Illinois, but even a train derailment or a truck accident could cause a spill or vapor leak that could require an evacuation or some other extraordinary emergency response. City staff members have been participating in the Federal NIMS training initiative for emergency responders, and advance planning by pre-arranged resource availability is another effort. To that end the City joined IPWMAN, a Public Works Mutual Aid organization. As yet another example of our intergovernmental cooperation outreach, we have entered into municipal building disaster backup agreements with the Villages of Kirkland and Kingston. These provide for use of municipal buildings in the event either suffers a loss of their facility through a disaster situation.

This year an emergency backup generator has been installed for the Municipal Center to ensure that governmental assistance, particularly Police operations, can continue despite power outages or disasters disrupting electric supply. Also during this past year, City staff continued participation in the "all risks assessment" process at the County level resulting in City inclusion in the County plan.

Last Fiscal Year, Commonwealth Edison announced plans for the Grand Prairie Gateway Transmission line corridor project. The City diligently attended informational meetings held by Commonwealth Edison and monitored this new major transmission line planned between Byron and Wayne, just east of South Elgin. ComEd initially mapped 4 potential corridors south of the City, with 2 of them being within the City's jurisdictional planning area. One of these, the second one south of the City, is the existing Com Ed transmission line right of way. The northern most alternate would run along Baseline Road, much closer to the City limits and not in keeping with the City's Comprehensive Plan. The City of Genoa joined with the City of Sycamore to assert that the existing Com Ed right of way would be preferable for the Grand Prairie Gateway Transmission line corridor project compared to the most northern alternative along Baseline Road. The City prepared a statement with numerous points outlining why the northern most Baseline Road alignment alternative would be highly undesirable, met with Com Ed on the issue, and a successful result occurred with ComEd proposing to use the existing Com Ed right of way as the preferred routing. This current Fiscal Year the Illinois Commerce

Commission approved the routing that was preferred by the City and for which the City's advocacy efforts supported.

The City has focused on maintaining controlled residential growth on a stable basis, compared to the very high housing starts of the past few years of many of our neighbors, which have now experienced huge drops as the cyclical market decline has occurred. During Calendar Year 2014, business improvements and resident home improvement activity continued with 117 total permits issued, representing a slight increase from the prior year.

A significant Economic Development accomplishment occurred with the announcement of the major expansion by Custom Aluminum Corporation. The largest new Industrial space project in the City in decades will total 37,500 square feet of production space to accommodate an aluminum press component for their existing operations.

Future long term benefits would be provided through the selection of the route for Amtrak service between Chicago and Dubuque of DeKalb County through Genoa, the most cost effective one. After all three studies recommended the Genoa routing, the Genoa/Southern Route was selected by IDOT. Then the previous Governor announced just prior to the current Fiscal year a change instead to a least cost effective, extremely costly, and incomplete project on a vastly inferior routing. We have worked very hard this past year, contacting the previous Governor, meeting with IDOT's Executive Director, and working with the new Governor to correct this reckless travesty. This has led to intense and diligent efforts by a coalition of Genoa community groups and regional organizations to correct a misguided use of our State tax dollars.

The City continues to enhance open space and our environment. The Prairie Project, 82 acres of open space along the west side of the Kishwaukee River, is progressively being transformed through a \$48,000 grant the City received from the Natural Resources Conservation Service in 2008. The City receives grant reimbursement based on work completed during the different phases of the multi-year project scheduled to be finished in 2017. The grant provides funding for restoration and management of declining habitats and wetland improvements. The grant also includes planting Oak and Hickory trees to develop Savanna areas.

This past year, the Public Works Department began construction of a walking path through this area, extending from the pedestrian bridge to the Forest Preserve, funded by grants obtained for this project.

Intergovernmental Cooperation is an important value and the City continues to work cooperatively with other local agencies and organizations, such as the Fire Protection District, Park District, School District, and Chamber of Commerce. Examples of our community cooperation orientation are present downtown, embodied by a sixth year for the volunteer Downtown Ice Skating rink, now operated by the Park District, the Intergovernmental Agreement with the Park District on the Community Garden project, and encouraging the Chamber of Commerce to take on the open Air Markets, Movies on Main Street and the Downtown Car show. Our intergovernmental agreement with the Park District for most of the second floor of our Municipal Center is a shining example of a win-win for our Citizens by local governments working together.

The City continues to expand our economic base and provide more shopping and services. To cite some of the recent activity:

- Custom Aluminum has embarked upon the largest Industrial Expansion in the City in decades with 37,500 square feet of Industrial expansion.
- Lloyd Landscaping and Garden Center moved into Genoa and initiated redevelopment
 of the former junkyard property at 662 Park Avenue/Route 72, for a Garden Center,
 recycled barn wood sales and landscaping business, also with assistance from the City
 including the City's low interest loan program.
- Prairie State Winery relocated through an expansion with outdoor seating for a portion
 of the former Victoria's Crossing Building at 222 West Main Street, and also
 subsequently acquired the remainder of the former Victoria's Crossing Building as part
 of their expansion.
- A new bakery, Latsis Bakery opened at the northwest corner of Main and Monroe in the downtown area.
- The Genoa Public Library District began construction of their planned new Library Building expansion project downtown at the southeast corner of Emmett and Main Streets. This project was the first new building constructed downtown in many years, perhaps decades!
- A new Brewery with a tasting room, a destination draw type of business, Cademon Brewing, opened in the former Prairie State Winery location, quickly filling this space on Main Street in the downtown area available due to the Winery expansion.
- The Corner Grill expanded into the space formerly occupied by the Speciality store, and further added not only sidewalk outdoor seating, but also expansion with an outdoor seating patio area as part of their growth.
- A new gift shop, Reyna's Gifts, opened on Main Street in the downtown area.
- A new antique, unique item and vintage item store, The Trading Post, opened at the northwest corner of Main and Genoa Streets in the former ESII store in the downtown area.

This year the City worked closely with DCEDC and became one of the limited participating municipalities in an intergovernmental agreement seeking to be designated an Enterprise Zone. The City was able to work for inclusion of significant land area for the application, which was filed before the end of the calendar year deadline, to be designated one of a limited number Enterprise Zones in the State.

Over the past few years major initiatives have been accomplished that will continue to provide enhanced services to our citizens. These include completion of the construction for the North Central interceptor, along with the Public Works Department upgrading the North Locust Street Lift Station and acquiring a trailer mounted high capacity 6" pump to deal with emergency situations, often weather induced. This year the City engaged consulting engineering assistance to prepare a second multiyear plan for street improvements as the original plan nears conclusion. This is consistent with other master planning efforts, since as part of planning for the future and having the best possible tools to manage growth, the City has an engineering master plan in place for the City's Water System. This includes a computer model

of the City's Water System which allows additions or changes to be evaluated on pressure and flow to the existing system to ensure any new development provides necessary upgrades. During a previous Fiscal Year, our commitment toward infrastructure master planning continued through a County foundation grant for additional stormwater management planning work.

This year, the City upgraded the City's website with enhanced graphics and appearance, but most importantly, with improved ease of use for our residents and businesses. On-line bill pay, and credit card acceptance on-line, or by phone besides on site, represents another enhancement through use of technology this year. The social media provides an unprecedented opportunity through technology in making government more accessible and available to our citizens and we can continue to embrace this opportunity in our new Fiscal Year. The addition of an intern position has provided us a cost-effective means to assist in advancing these initiatives in addition to expanding our connection with our residents through facebook and twitter to communicate important information.

In another initiative through technology, the City implemented the **CodeRED** system. The CodeRED system provides the City with emergency communications outreach to send telephone calls, text messages, emails and social media contacts in an effort to effectively inform residents in order to protect life and property.

The Police Department has continued its professional growth as evidenced in the past by being the first department in DeKalb County to be CALEA certified, establishing a new Administrative Adjudication program with intergovernmental cooperation through participation by the Village of Kirkland. The Administrative Adjudication program has become a model for smaller communities including through intergovernmental participation, making Genoa once again a leader. The process covers a wide range of cases involving violations of municipal ordinances that were previously heard in the DeKalb Circuit Court. The hearings take place at our Municipal Center, expedites resolutions, reduces litigation expense, allows the Circuit Court to focus on more serious offenses, and these hearings are more convenient for residents who wish to contest a ticket or citation. This year the Department intends to expand its efforts to pursue property maintenance issues such as tall weeds, ordinance/permit compliance, and similar issues, in cooperation with the Building inspector, for adjudication when necessary.

In the past few years, the Police Department has added Officer Kane, a police canine, to the force with the generous support of community donations. Last Fiscal Year the Police Department purchased and placed into service a **Speed Alert Message Display System**, a trailer mounted device which measures and immediately displays a vehicle's speed. It allows for 18 different types of messages, has remote wireless controls, and stores information for later analysis.

Public Works continued the program for streetscape improvements in the Downtown area during this Fiscal Year, including obtaining new banners for this spring and summer.

The City continued an *Accelerated Street Improvement Program* this Fiscal Year. Already accomplished has been over \$1,900,000 in new streets:

Resurfacing West Main/Genoa Road from Main Street past the Middle School, and all
of East First Street, between Sycamore Street and Eureka through a Federal Stimulus
grant.

- Main Street resurfaced from Rte. 23 to West Main with 100% State funding. This project included curb work to revise sidewalks at intersections where necessary to meet current Federal handicapped accessibility standards.
- The Northeast Streets area project was completed resulting in resurfacing of all of Robinson Street; North Locust, between Main and Railroad; North Stott Street; and all of Stiles Street.
- The Second Street area was completed resurfacing West Second Street, from A Street to Emmett; A Street, between First Street and Second Street; North Monroe between First Street and Second Streetⁱ and Washington, between First Street and Second Street, all through a State grant awarded for this project.
- Washington Street was completed from Hill Street to First Street funded by the Federal STP grant program.
- North Brown Street was resurfaced from Route 72/Main Street to the I.C.E. rail tracks through the STP Grant program.
- This current year resurfacing was completed on South Emmett Street from Jackson Street to Hill Street, Village Green Drive from Main Street to First Street, and the portion of South Hadsall Street from just north of Pearson Drive to the end at the cul-de-sac.

The City has also received grant approval for South Sycamore Street for future Grant funded construction, illustrating our commitment to advance planning and continually setting further goals as existing ones are achieved.

Highlights for the new Fiscal Year include:

Another significant effort represented by our new proposed budget is continuation of the unprecedented multi-year improvement to our City Street System through by our *Accelerated Street Improvement Program*. This initiative is a product of careful planning and strategy achieved through the Special Census providing more State shared MFT revenue and gaining access to STP-U funding for the first time. The goal has been to resurface over 20,000 lineal feet of streets financed through these expanded revenues, legally restricted to street improvements. This represents nearly 4.0 miles of streets. This year a contract was initiated for an update for a new multi-year street resurfacing program plan as the original plan nears completion.

Construction will be continuing this summer on the City's Accelerated Street Improvement Program.

<u>Jackson Street</u>, construction will be proceeding for resurfacing from Jackson Court to Genoa Street.

South Genoa Street, from Main Street to Hill Street, is currently under engineering design for resurfacing.

And the City has obtained Federal STP grant funding for resurfacing a portion of <u>South Sycamore Street</u>. For the South Sycamore Street project, details of the project and timing will be dependent upon the engineering design work, and construction timing will be determined

based upon funding levels released each year within the overall federally funded program within the State of Illinois.

The 2015-2016 Budget document follows the same format as it has during the past several years. This will allow the reader ease in reviewing the section(s) of their interest. The Budget Summaries Section contains a number of summaries that provide an overview of the Budget. The last three sections provide the specific line items for each of the City's Funds, Departments and Divisions.

Total City Revenues are expected to be \$5,096,803 in 2015-2016. On the expenditure side, total operating expenditures are very close to the amount in the prior Fiscal Year. Overall expenditures are higher than revenue since some funds have expenditures from prior year revenue, for example, funds will be expended from motor fuel taxes funds for street improvements this year, although the revenue actually was received in a prior fiscal year, and these funds are legally sequestered only for this purpose.

The 2015–2016 Budget includes a major emphasis on enhancing services and communication, particularly by utilizing technology, Street Capital Improvements financed through Motor Fuel Tax which is legally restricted to these purposes, continued emphasis on Economic Development to benefit the City in the future, repair and replacement of capital equipment, and wastewater treatment plant engineering needed to continue seeking grant funding for this project.

Page five in the Summary Section is a schedule of Expenditures by Fund and page two is a schedule that shows Expenditures by Service Area. The following is a list of those Service Areas along with their total budget dollars and their relative percentages of the total budget.

General Government	542,065	10%
Police Protection	1,474,220	26%
Street & Public Property	1,257,709	23%
Water & Sewer System	1,581,743	28%
Refuse Disposal and Debt Service	615,003	11%
CDAP Loans and Miscellaneous	109,430	2%
Totals:	\$5,580,170	100%

The relative percentages not only represent the percent of total budget for each Service Area, but also the percent of each dollar expended. This means that 26 cents of each dollar spent goes for Police Protection, 23 cents for Street Programs and 28 cents for Water & Sewer services with the other services making up the balance of the budget.

Acknowledgements: These past years have been fraught with challenge due to national economic distress, but we have persevered and are now gaining the opportunities of the reviving economy to improve our services to the public and our community in business and

infrastructure. Although the past few years have been the most challenging for local governments perhaps ever, we have still accomplished much to improve our community. I'd like to once again thank the entire City Staff, City Council, City Clerk, our Administrative Consultant, City Attorney, City Engineer, and City Commissions & Boards for their assistance in the guidance and management of this community. I would especially like to thank David Jepson, our Budget Officer and Financial Advisor, for his guidance and expertise in maintaining and balancing our budget throughout the year. In addition, his efforts have not only made us the smallest municipality in Illinois with the GFOA "Excellence in Financial Reporting Award", but we can be especially proud of this distinction for 9 straight years!

Conclusion: During this now concluding Fiscal Year, we have worked together as Mayor and City Council to maintain our essential fiscal stability, while accomplishing some very significant initiatives. Our New Website, Downtown Banners, Downtown Redevelopment project, and new business growth all substantiates a very productive year. I look ahead to working with you in this new Fiscal Year to continue our ongoing projects and to advance further opportunities successfully forward. This new year promises to further enhance Genoa as a community of choice for people to live and businesses to prosper, and we shall endeavor to further complement our diverse range of qualities as we prepare for the future.

Respectfully,

Mark Vicary (IT)

Notice of Public Hearing City of Genoa, Illinois - Annual Budget For the May 1, 2015 - April 30, 2016 Fiscal Year

A public hearing to approve the Annual Budget for the City of Genoa, DeKalb County, Illinois for the fiscal year beginning May 1, 2015, and ending April 30, 2016, will be held on April 21, 2015, at 6:30 pm at City Hall, 333 E. First Street, Genoa, Illinois 60135.

Any person desiring to appear at the public hearing and present testimony to the City Council may contact Dennis DeGuido, City Clerk (815) 784-2327.

The Tentative Annual Budget for the City of Genoa, Illinois for the May 1, 2015 - April 30, 2016 fiscal year contains the following proposed expenditures:

General Fund	\$ 2,308,115
Special Revenue Funds	1,450,614
Debt Service Fund	205,003
Capital Projects Fund	-
Enterprise Funds	1,581,743
Internal Service Fund	147,000
Police Pension Fund	114,355
Totals Less: Interfund Transfers	\$ 5,806,830 (226,660)
City Totals	\$ 5,580,170

Dennis DeGuido, City Clerk
